

SALVADOR LÁZARO

Electronics, Robotics and Mechatronics Engineering Student

PROFESSIONAL PROFILE

Electronic Engineering student specialized in robotics and control. Experience in the design and control of a robotic arm (TFG) through CAN interface and automation with ABB robots. Organized profile, oriented towards continuous improvement and willing to learn. Interested in industrial robotics, electronics and project organization.

EDUCATION

Degree in Electronics, Robotics and Mechatronics Engineering

University of Málaga

TECHNICAL SKILLS

- Linux / Git / GitHub
- MATLAB / Simulink
- Orcad Capture CIS
- Vivado/Vitis AMD (FPGA y Psoc)
- LabView
- SolidWorks
- RobotStudio (ABB)
- C++ / ROS2 / Python
- Autocad

LAUNGUAGES

- Spanish - Native
- English - Advanced (C1)
- French - Intermedium (B1)

SOFT SKILLS

- Multidisciplinary Teamwork
- Supervision capacity
- Problem solving
- Attention to detail
- Proactivity

Driving licence B

TECHNICAL EXPERIENCE

- **University Robotics Team RoboRescue** 2025-2026
 - Participation in the design, assembly and testing of robotic systems
 - Collaborative work in technical environments with deadlines
 - Mechanical and electronic problem solving
- **Building a FPV drone from scratch** 2025
 - Component selection, welding, FC (Betaflight) programming and configuration, FPV integration and PID tuning.
 - Flight testing and system performance validation.

ACADEMIC PROJECTS

- **Robotic Arm - Final degree project** 2026
 - Software development for an articulated robotic arm
 - Architecture based on ROS2
 - Implementation of motion and manipulation control
 - Remote teleoperation system.
- **Mobile Robot - Subject Project** 2026
 - Programming, control and assembly of mobile robot with MicroROS
 - Navigation, obstacle avoidance and teleoperation
- **Design with Microcontrollers** 2025-2026

Experience in programming microcontrollers and FPGAs acquired through advanced electronic engineering projects and subjects.

COMPLEMENTARY FORMATION

- **The Construct Robotics Institute** 2025
 - Linux for Robotics
- **Public Speaking and Communication Course** 2025
- **DigitalTwins sponsored by Denso Ten** 2024
- **Entrepreneurship and Project Management Course** 2024
